

SALES LEADERSHIP · AI & SOFTWARE DEVELOPMENT · PROGRAM DESIGN

Christopher Grisconis

Founder & Executive Director, Advanced Creation Studio

Nine years of consultative sales and business ownership, now channeled into software development, AI-enabled workforce pathways, and evidence-based reentry programming for federal and state partners.

Reentry with Dignity. Results with Purpose.

A decade of operating inside high-accountability institutional environments built the discipline; nine years in consultative sales built the commercial instinct; a deliberate pivot into AI and software development built the future. Today those three converge in a single practice — selling, building, and teaching the skills that move people into the fastest-growing career field in the modern economy.

CORE COMPETENCIES

SALES & REVENUE

- + Consultative & Solution Selling
- + Full-Cycle Sales Ownership
- Pipeline Qualification

- + Objection Handling
- + Closing & Negotiation
- + Account Retention
- + Sales Enablement & Onboarding

ENGINEERING & AI

- + JavaScript (ES6+)
- + HTML5 & CSS3
- + React Native / Expo
- + Responsive UI Architecture
- + Client-Side State Persistence
- + Structured Content Modeling
- + Git / GitHub Version Control
- + GitHub Pages & Cloudflare Deploy
- + AI-Assisted Development
- + Prompt Engineering

LEADERSHIP & PROGRAM

- + Curriculum Design
- + Motivational Speaker Certification
- + Public Speaking & Platform Delivery
- + Mentorship Frameworks
- + Conflict De-escalation
- + Cross-Demographic Facilitation
- + Stakeholder Engagement
- + P&L & Operations Management

OPERATIONS & TRADE

- + High-Volume Culinary Production
- + Food Safety & Sanitation Compliance
- + Inventory & Supply Control
- + Industrial Coatings & Surface Prep
- + Facilities & Custodial Systems
- + Finish Carpentry
- + Logistics & Dispatch Coordination

EDUCATION

B.S., Computer Technology & Software Development

Concentration: Artificial Intelligence, Coding, Application & Website Creation

Post University

General Educational Development (GED)

Rowan-Cabarrus Community College — Salisbury, NC

Continuing Technical Development

Self-directed study in JavaScript, React Native, application architecture, and modern deployment workflows — 2023 to present

01 PROFESSIONAL SUMMARY

Sales and business-development professional with nine years of consultative selling, account ownership, and small-business P&L leadership — now operating as a self-taught application and web developer and the founder of a nonprofit workforce-development organization. Documented top-of-cohort closing performance, a track record of training and ramping other sellers, and four years of independent business ownership across services and logistics. **Currently pursuing a B.S. in Computer Technology and Software Development (AI, coding, and application/website creation)** while shipping production web and mobile projects, including a full-scale interactive guide platform with user accounts and persistent progress tracking. Brings an unusually durable work ethic forged in a decade of high-accountability

institutional operations, and applies it equally to quota attainment, codebases, and community programming.

02 PERFORMANCE AT A GLANCE

9 yrs Sales, marketing & business ownership	#1 Unit volume among all new hires, first week — TruGreen	3,000+ Meals produced daily in institutional food operations	2 Businesses founded and operated independently
7+ Interactive guide products shipped on QuestAndGuides	10 yrs Continuous operations in a zero-error-tolerance environment		

03 LEADERSHIP PROFILE

OPERATING MINDSET

For ten years I worked inside a structured federal institutional environment where reliability was not a performance metric — it was the baseline condition for everything else. Ten-hour production shifts, six days a week, under continuous audit, with no room for a bad day. That environment taught three things that transfer directly into commercial work: **show up before you are asked, de-escalate before you defend, and finish the job to the standard, not to the clock.**

I returned in June 2025 with a decision already made: build a career in the field with the steepest growth curve in the world rather than accept the ceiling that is usually assumed for people in my position. Within months I had enrolled in a computer science degree program, shipped production web software, and stood up a nonprofit. The hunger is not a talking point — it is the documented sequence of the last twelve months.

Founder & Executive Director

2025 — PRESENT

Advanced Creation Studio · Concord, NC

Nonprofit recidivism-reduction and workforce-development organization positioned as a credible partner to federal and state agencies. Premium authority, human-centered delivery, evidence-based outcomes.

- + Founded and operationalized a **recidivism-reduction program** that moves recently released individuals into technology and AI career pathways — deliberately targeting the fastest-growing career field rather than the low-ceiling roles typically offered to returning citizens.
- + Designed the organization's **three program pillars**: reentry education and life-readiness coaching; reintegration planning with mentorship and wraparound community support; and AI and workforce-readiness training aligned to high-growth industry demand.
- + Built and delivers a **Motivational Speaker Certification track** — the program's signature engagement instrument. Participants are trained in narrative construction, platform delivery, audience command, and professional presence, then deployed to speak across demographics. The certification is what keeps youth cohorts, returning citizens, and community stakeholders aligned around a single message.
- + Developing a dedicated **youth offender program** teaching multiple concrete routes to financial independence — technical skills, digital entrepreneurship, and asset-building — explicitly countering the assumption that a record limits a young person to entry-level food-service work.
- + Authored the organization's brand and communications system end to end: positioning, messaging architecture, visual identity, and a contract-ready creative standard engineered for federal and state RFP submission and audit-ready consistency across every touchpoint.
- + Designed, built, and deployed the organization's web presence independently, applying the same development skill set the program teaches its participants.
- + Leads stakeholder engagement with government agencies, community organizations, and employer partners to build direct hiring pipelines for program graduates.

Sales Associate

MAY 2026 — PRESENT

TruGreen · Indian Trail, NC

Full-cycle consultative sales of residential and commercial turf and property-care programs.

- + Closed the **highest unit volume of any new hire in the first week of employment** — a benchmark rarely reached even by experienced representatives — demonstrating immediate command of the product, the discovery process, and the close.
- + Runs a consultative discovery motion that surfaces the customer's actual problem — turf health, insect pressure, time cost of DIY maintenance — and positions the program against that problem rather than against a price sheet.
- + Mentors incoming associates on discovery questioning, objection handling, and follow-up discipline, measurably compressing their time-to-quota.
- + Maintains consistent target attainment through disciplined pipeline qualification and a follow-up cadence that keeps stalled opportunities alive.

Independent Application & Web Developer

2023 — PRESENT

Self-Employed · Concord, NC

Self-directed practice building and shipping production web and mobile software.

- + Designs and ships responsive web applications — dashboards, trackers, and interactive tools — in **HTML5, CSS3, and modern JavaScript**, owning the work from information architecture through production deployment.
- + Builds cross-platform mobile applications in **React Native and Expo**, testing across device classes and distributing through Expo Go for real-user validation.
- + Taught himself the entire delivery lifecycle without formal instruction: scoping, architecture, implementation, debugging, Git version control, and deployment through GitHub Pages and Cloudflare.
- + Applies AI tooling as a working part of the development process — using it to accelerate research, review, and iteration rather than as a substitute for understanding the code.

Food Service Operations Lead

2015 — 2025

Institutional Operations · Federal Correctional Institution

High-volume institutional culinary production serving a resident population of approximately 1,500, under continuous supervision and formal inspection standards.

- + Produced and served **3,000+ meals per day** — two full services for a 1,500-person population — across ten-hour shifts, six days per week, sustained over a multi-year tenure with no lapse in delivery.
- + Executed to **institutional food-safety and sanitation standards**: temperature control and logging, cross-contamination prevention, chemical handling, equipment sanitation, and inspection-ready line discipline at all times.
- + Managed portion control, batch scaling, inventory draw, and waste reduction against fixed budgets and non-negotiable headcounts — a hard constraint environment with zero tolerance for shortfall.
- + Accommodated **medical, religious, and dietary-restriction meal requirements** as a compliance obligation, requiring precise tracking and separate production workflows alongside main-line volume.
- + Coordinated and directed multi-person kitchen crews drawn from an involuntary, highly diverse, and frequently adversarial labor pool — building functional teams where no positional authority and no financial incentive existed.
- + Operated daily under conditions demanding **conflict de-escalation, composure under pressure, and situational awareness**; maintained productive working relationships across sharply divided demographic and cultural lines.
- + Developed the reliability profile that now anchors every other role on this résumé: a decade of showing up to a demanding production shift, on time, to standard, without exception.

Facilities Maintenance & Industrial Coatings Technician

CONCURRENT ASSIGNMENT

Institutional Operations · Federal Correctional Institution

Large-format painting, surface preparation, and custodial systems maintenance across institutional facilities.

- + Performed **industrial-scale painting and coating work** — surface preparation, patching, priming, and finish application across corridors, housing units, dining halls, and administrative space under square-footage and deadline targets.
- + Executed custodial and sanitation programs to **formal inspection standards**, maintaining continuously audit-ready condition rather than periodic cleanup.
- + Handled chemical inventory, dilution ratios, PPE compliance, and safety-data protocols in a strictly controlled materials environment.
- + Coordinated scheduling and supply allocation across concurrent work areas to keep facilities in service while work proceeded.
- + Built the finish-quality standard and jobsite discipline later carried directly into ownership of a commercial painting and property-services company.

EARLIER CAREER — SALES, OWNERSHIP & TRADE

Sales Consultant

DATES ON REQUEST

Southern Auto Group · Charlotte, NC

- + **Consistently ranked among the top closers on the sales floor** through disciplined follow-up, active listening, and expert objection handling.
- + Guided customers through the full purchase cycle — needs discovery, trade valuation, financing structure, and contract close — on both new and pre-owned inventory.
- + Trained incoming sales representatives on the dealership's consultative process, shortening ramp time for new floor staff.

Owner / Operator

DATES ON REQUEST

Grisconis Painting & Property Services · Concord, NC

- + Founded and ran a commercial and residential painting, carpentry, and custodial maintenance contractor serving local property owners.
- + Owned the entire P&L: estimating, pricing, client acquisition, scheduling, invoicing, collections, and quality control.
- + Recruited, trained, and led a small crew, developing their painting and finish-carpentry skill to a client-facing standard.
- + Generated repeat contracts and referral flow — the operative revenue metric for a services business.

Owner-Operator, Freight Coordination

DATES ON REQUEST

Grisconis Logistics · Charlotte, NC

- + Brokered and coordinated regional non-CDL box-truck freight routes and delivery destinations.
- + Built shipper and broker relationships to negotiate competitive rates and secure consistent load volume.
- + Managed dispatch scheduling, route planning, and fleet maintenance to protect on-time delivery performance.

Finish Carpentry Apprentice

DATES ON REQUEST

Cornerstone Builders · Concord, NC

- + Performed framing, trim, and finish carpentry on residential remodel and new-construction projects.
- + Read blueprints and worked directly under lead carpenters to hold tolerance and code compliance.
- + Built core competency in tool operation, material estimation, and jobsite safety.

POST-RELEASE EMPLOYMENT · 2025 — 2026

Landscaping Technician

2025 — 2026

Turf Care Management & Design · Concord, NC

- + Performed mowing, edging, fertilization, and debris removal across residential and commercial accounts.
- + Operated and maintained commercial-grade equipment under strict safety protocol.
- + Built repeat client relationships that produced steady referral business — direct groundwork for the move into turf-program sales at TruGreen.

Facilities & Custodial Maintenance Technician

2025 — 2026

Walkon · Salisbury, NC

- + Delivered custodial maintenance and commercial cleaning across multiple properties, holding facilities audit-ready.
- + Managed janitorial supply inventory and cleaning schedules to minimize client downtime.
- + Held this role concurrently with independent development work and nonprofit build-out — three commitments run in parallel without slippage.

05 SELECTED TECHNICAL WORK

Quest & Guides – Interactive Completion Platform

questandguides.com

A content-heavy web application delivering 100%-completion walkthroughs with live, stateful progress tracking.

- + Built **interactive checklist systems** in which every quest, collectible, and trophy is a live control — with progress persisting automatically across sessions, requiring deliberate client-side state design rather than static content.
- + Implemented **user account creation** and per-user progress persistence across the guide library.
- + Modeled structured content at real scale — the Assassin's Creed Shadows guide alone tracks **86 story quests, 79 side quests, 687 regional collectibles, and 55 trophies** as individually addressable, checkable entities.
- + Shipped a library of **seven-plus full guide products** (Red Dead Redemption 1 & 2, The Witcher 3, Elden Ring Nightreign, Ghost of Yotei, 007: First Light, and others) on a shared templating and tracking architecture.
- + Built per-region collectible trackers with live aggregate counts and trophy roadmaps carrying unlock conditions and missable flags — data-relationship modeling, not flat pages.

RESPONSIVE UI

Advanced Creation Studio – Organizational Web Platform

advancedcreationstudio.com

The nonprofit's public-facing platform and brand system, designed and built in-house.

- + Designed and implemented a complete **brand and design system** — navy and signal-blue palette, Montserrat/Lato typographic pairing, and a component vocabulary applied consistently across every section.
- + Built a responsive single-page architecture presenting positioning, service lines, program pillars, and the flagship recidivism-reduction program with clear conversion paths for agency partners.
- + Authored the messaging framework and all site copy to federal and state procurement standards — compliance-driven, audit-ready, and structured for RFP reuse.

Jeff Day

Executive Manager, TruGreen LTD · June 2, 2026

"Chris has been an instrumental member of our sales organization and has consistently distinguished himself as a top-tier performer, demonstrating a rare combination of grit, strategic acumen, and an unwavering commitment to driving revenue growth."

Consultative Discovery — "Chris has a unique talent for uncovering the true pain points of a prospect. Rather than rushing to a pitch, he invests time in asking high-impact, probing questions that allow him to position our solutions as the essential answer to the client's specific business challenges."

Pipeline Management — "By meticulously qualifying leads, Chris ensures his time is focused on opportunities with the highest probability of conversion, maximizing efficiency and minimizing the dead time that often plagues less experienced representatives."

Negotiation & Objection Handling — "Chris is a master at turning a no into a maybe, and a maybe into a signed contract. He remains incredibly composed under pressure, often identifying creative solutions to resolve pricing disputes or contract bottlenecks."

Dedication to the Outcome — "Above all, Chris is a closer. He routinely exceeds his monthly and quarterly quotas, and he does so with a level of professionalism that lifts the performance of the entire team around him. I recommend Chris for any sales or client-facing role with the highest degree of confidence."

— Jeff Day, Executive Manager, TruGreen LTD

Jennifer Rubio

Personal Assistant & Professional Mentor · July 19, 2026

"What stands out most about Chris is his drive to keep learning and finish what he starts. In a relatively short span of time, he has taught himself the fundamentals of JavaScript, React Native, and website deployment well enough to build working tools without a formal technical background."

"He approaches new problems methodically, asks direct questions when something isn't clear, and follows through until a project actually works — not just until it looks finished."

"He communicates clearly, takes feedback well, and consistently pushes for accuracy and quality over shortcuts. Any employer who values a fast learner with real initiative, follow-through, and a genuine growth mindset would benefit from having him on their team."

— Jennifer Rubio, Personal Assistant & Professional Mentor
